

Catalog Workflow

CONFIDENTIALITY STATEMENT

Information and data contained herein are proprietary and confidential. This information should not be disclosed to any third party without the prior written consent of ABB Optical Group LLC.

The diagram above describes the sequence of actions required to pull the complete product catalog using the APIs. The *products/listvariantidsbyproductid* API returns all variants of the request product, and these may be in thousands. Therefore, the next API in the sequence – *products/variantbyid* – accepts a list of variant IDs to be fetched. The caller may pick a batch count that works best for their system.
